NGUYỄN MINH PHƯƠNG

Software Developer

phuongnm150505@gmail.com | +84 896 980 529 | Ho Chi Minh City | github.com/minhphuong150505 | linkedin.com/in/phuongnm150505

TECHNICAL SKILLS

Programming: Java, TypeScript, JavaScript, Python, SQL, HTML, CSS
Backend: Java EE, Spring Boot 3, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JDBC, Servlet / JSP, Lombok, JWT, OAuth2
Frontend & Mobile: React, TypeScript, JavaScript, HTML, CSS, Android, Retrofit
Database: PostgreSQL, MySQL, Flyway
Testing & Tools: JUnit, Mockito, Playwright, Postman, Git, GitLab, Maven, Docker, Jira, Confluence, Agile / Scrum
AI-assisted Development: Claude Code, Codex, GitHub Copilot
AI / ML: PyTorch, Hugging Face Transformers, PEFT, QLoRA

KEY PROJECTS

Chinese Learning Platform - Full-Stack AI Web App | Solo GitHub
Tech stack: Java 21, Spring Boot 3, Spring Security, WebClient, Python, FastAPI, React, TypeScript, PostgreSQL, Flyway, Azure Speech, Docker, GCP

- Designed, built and deployed the whole product alone in under **2 months**; used by friends, and iterated on their feedback.
- Backend: layered Spring Boot 3.3 (Java 21) REST API (controller / service / repository) with stateless JWT + Google OAuth2, orchestrating an LLM provider (chat, translation, writing feedback), Azure Speech and a Python FastAPI service for TTS and F0 tone analysis; API keys stay server-side.
- Frontend & deployment: React + TypeScript single-page app for chat, pronunciation, translation, writing and HSK practice; PostgreSQL schema versioned with Flyway; every service containerized with Docker and deployed on GCP behind Caddy HTTPS.

Lensora - Camera-Gear Marketplace (Android + Backend) | Course project • Team of 4 GitHub
Tech stack: Java, Spring Boot, Spring Security, RestTemplate, PostgreSQL, Flyway, Android, Retrofit, Docker Compose, Postman

- As lead developer (1 of 2 developers), designed the JWT-secured Spring Boot REST API for buying, selling and renting photography gear (auth, products, cart, orders, rentals).
- Turned buy / sell / rent business rules into a PostgreSQL schema managed with Flyway; integrated MoMo payment and GHN shipping via RestTemplate (JSON APIs, HMAC-verified payment callbacks) plus a catalog-grounded DeepSeek chatbot.
- Built the native Android client (Java / XML, Retrofit) on the same API and verified end-to-end checkout and rental flows with manual and Postman testing across all **11** API modules.

META-CXR - Multimodal AI for Chest X-ray Report Generation | Graduation thesis • Solo GitHub
Tech stack: Python, PyTorch, Hugging Face Transformers, PEFT, QLoRA, Docker, pytest

- Reproduced and extended a two-stage vision-language model (IEEE Access 2025) in PyTorch on MIMIC-CXR: two medical vision encoders + Q-Former classify **14** abnormalities, then MedGemma-4B fine-tuned with QLoRA writes the report.
- Raised test macro-AUROC **0.744** → **0.764** on **3,269** held-out studies with controlled ablations; caught **166** MS-CXR boxes leaking into the test split; **1,012** pytest tests passed.

WORK EXPERIENCE

FPT Software | Java Developer Intern Ho Chi Minh City | May 2026 - Oct 2026
Project BUHINH - on-premise to cloud migration of a Japanese automaker's manufacturing BOM (MBOM) system
Tech stack: Java EE, Spring Boot, Spring MVC, JSP, JavaScript, JDBC, SQL, IBM Db2, Maven, GitLab, Jira, GitHub Copilot

- Helped the team finish migration Phase 2 ahead of schedule by moving legacy Java EE sub-systems to Spring Boot / Spring MVC, using GitHub Copilot under the team's prompt rules and hand-reviewing every pattern it flagged.
- Brought the cloud version of the parts-applicability search subsystem back in line with the legacy on-premise system: about 50 UI and 30 logic defects fixed and merged through GitLab merge requests.
- Found about 15 on-premise vs cloud differences, logged them on Jira with reproducible steps and evidence, and resolved about 15 tickets as a full team member, on or ahead of deadline; internship rated 10/10 by the company.

EDUCATION

University of Information Technology (UIT) - VNU-HCM | Information Systems 2023 - 2027
GPA: 8.5/10 | Expected graduation: Jun 2027

AWARDS AND CERTIFICATES

- Outstanding Student - UIT - VNU-HCM, Semester 2 of academic year 2024 - 2025 2025
- Academic Scholarship - UIT - VNU-HCM, Top 8% of major, awarded for 2 semesters 2023 - 2025

LANGUAGES

English: B2 (CEFR) equivalent - reads technical documentation with ease and communicates confidently in a professional setting
